Somerset COVID-19 Local Outbreak Management Plan Dashboard

Date range 10-Jan to 16-Jan

Weekly rate per 100k

The numbers in this map show the current cases in the past 7 days, the colour of the tag shows the equivalent rate of positive cases per 100,000 population over a 7 day period. Case numbers in Taunton, Wellington, Chard, Yeovil, Bridgwater and Frome have been combined across the urban area with rates based on the combined area population.

Somerset COVID-19 Local Outbreak Management Plan Dashboard

Latest R number range for the South West

1.2 - 1.5

Last updated on Friday 15 Jan 2021

Produced by:

UK Government Scientific Advisory Group for Emergencies (SAGE)

What is R?

The reproduction number (R) is the average number of secondary infections produced by 1 infected person.

An R number of 1 means that on average every person who is infected will infect 1 other person, meaning the total number of new infections is stable.

Region	R
UK	1.2 - 1.3
England	1.1 - 1.3
East of England	1.0 - 1.3
London	0.9 - 1.2
Midlands	1.2 - 1.4
NE and Yorks	1.1 - 1.3
North West	1.2 - 1.5
South East	1.0 - 1.2
South West	1.2 - 1.5

Data type	Next updated	How published	Link for more information
Lab confirmed cases: Pillars 1 & 2	20/01/2021	Published daily ~5pm with data to day before. By specimen date.	https://coronavirus.data.gov.uk/
Data by MSOA for the map	20/01/2021	Published daily. By specimen date.	None. Not publicly distributed. Data based on PHE reported cases. To note, this may differ slightly from data on the coronavirus.data.gov.uk website due to additional data cleaning by PHE.
R value from SAGE group	22/01/2021	Published weekly on Friday.	https://www.gov.uk/guidance/the-r-number-in-the-uk
Pillar 2 testing	26/01/2021	Summarised weekly on Wednesdays and Thursdays	None. Not publicly distributed.
Death counts (ONS) County and district level	26/01/2021	Published weekly on Tuesday with data to the Friday 11 days before.	https://www.ons.gov.uk/peoplepopulationandcommunity/healthandsocialcare/causesofdeath/datasets/deathregistrationsandoccurrencesbylocalauthorityandhealthboard

As of 2nd June 2020, numbers of lab-confirmed positive cases now include those identified by testing in all settings (pillars 1 and 2).

NB The higher case numbers seen in early June include a number of cases that have been falsely identified as positive following an issue at the laboratory. For further information please see the following statement from Somerset NHS Foundation Trust <https://somerseft.nhs.uk/?news=issue-affecting-some-covid-19-test-results-for-some-inpatients-at-musgrove-park-hospital>

In January 2021, we changed the presentation of deaths data to be shown compared to the average and five year high and low deaths by date of occurrence rather than date of reporting. Deaths by date of reporting fluctuates more, especially when affected by bank holidays. Reporting by date of death does mean the latest week's figures are usually slightly incomplete when first reported due to delays in registrations of some deaths whereas the comparison years are more complete. For week 53 we have taken an average of 52 and week 1 comparison years.
