Outbreaks and Clusters

This represents the number of outbreaks and clusters currently being managed. Outbreaks are any situation with two or more cases, where at least two cases are known to be related to each other. Clusters are any incidents being managed at the same setting with two or more cases but where there is no established link between any of the cases.

Somerset COVID-19 Local Outbreak Management Plan Dashboard - Wider Context

Latest R number range for the South West

0.9 to 1.1

Last updated on Friday 17 Sep 2021

Produced by:

UK Government Scientific Advisory Group for Emergencies (SAGE)

What is R?

The reproduction number (R) is the average number of secondary infections produced by 1 infected person.

An R number of 1 means that on average every person who is infected will infect 1 other person, meaning the total number of new infections is stable.

| Region | R |
|-----------------|--------------------|
| UK | No longer produced |
| England | 0.9 to 1.1 |
| East of England | 0.9 to 1.1 |
| London | 0.9 to 1.1 |
| Midlands | 0.9 to 1.1 |
| NE and Yorks | 0.9 to 1.1 |
| North West | 0.9 to 1.1 |
| South East | 0.9 to 1.2 |
| South West | 0.9 to 1.1 |

Somerset COVID-19 Local Outbreak Management Plan Dashboard - COVID Vaccinations

This page will be further developed once there is more routinely available data published nationally.

This vaccination data is NHS data, reported here with the agreement of the Somerset Clinical Commissioning Group. Specific queries regarding vaccination need to be directed towards the NHS. For more information on the local COVID-19 Vaccination Programme please see [Covid-19 vaccinations in Somerset - Somerset CCG](#)

Population numbers are based on ONS 2019 estimates hence potential for uptake over 100%.

Percentage of 18+ population vaccinated at least once = 94.9%

Percentage of 18+ population vaccinated twice = 89.4%

Somerset COVID-19 Local Outbreak Management Plan Dashboard - Data

| Data type | Next updated | How published | Link for more information |
|--|--------------|---|---|
| Lab confirmed cases: Pillars 1 & 2 | 22/09/2021 | Published daily ~5pm with data to day before. By specimen date. | https://coronavirus.data.gov.uk/ |
| Data by MSOA for the map | 22/09/2021 | Published daily. By specimen date. | None. Not publicly distributed. Data based on PHE reported cases. To note, this may differ slightly from data on the coronavirus.data.gov.uk website due to additional data cleaning by PHE. |
| R value from SAGE group | 24/09/2021 | Published weekly on Friday. | https://www.gov.uk/guidance/the-r-number-in-the-uk |
| Pillar 2 testing | 22/09/2021 | Summarised weekly on Wednesdays and Thursdays | None. Not publicly distributed. |
| Death counts (ONS) County and district level | 28/09/2021 | Published weekly on Tuesday with data to the Friday 11 days before. | https://www.ons.gov.uk/peoplepopulationandcommunity/healthandsocialcare/causesofdeath/datasets/deathregistrationsandoccurrencesbylocalauthorityandhealthboard |
| Vaccination data | 23/09/2021 | Published weekly on Thursday with data to Sunday before. | https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-vaccinations/ |
| Hospital Activity | 23/09/2021 | Published weekly on Thursday with data to Tuesday before. | https://www.england.nhs.uk/statistics/statistical-work-areas/covid-19-hospital-activity/ |

As of 2nd June 2020, numbers of lab-confirmed positive cases now include those identified by testing in all settings (pillars 1 and 2).

In January 2021, we changed the presentation of deaths data to be shown compared to the average and five year high and low deaths by date of occurrence rather than date of reporting. Deaths by date of reporting fluctuates more, especially when affected by bank holidays. Reporting by date of death does mean the latest week's figures are usually slightly incomplete when first reported due to delays in registrations of some deaths whereas the comparison years are more complete. For week 53 we have taken an average of 52 and week 1 comparison years.
